HM #2
Max points – 20

To do:

1) Go to https://symu.co/freebies/templates-4/eos-psd-template/ and download
2) Using HTML and CSS create page
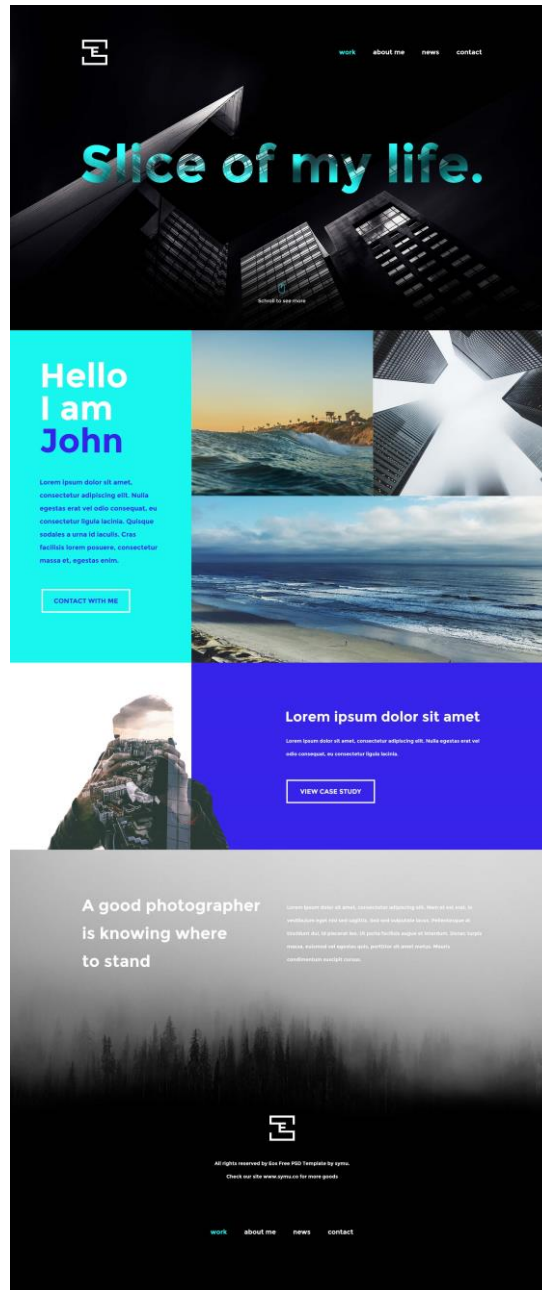

3) You can use any images, any colors, any fonts or use existing
4) No need to use Photoshop, but you can download free trial PS for more comfortable work: https://www.adobe.com/ua/products/photoshop/free-trial-download.html
5) No need to do pixel perfect
6) Only desktop version. No need to do tablet or mobile versions

7) No need to use JavaScript or PHP
8) No need to use gulp, grunt, webpack
9) No need to use any CSS frameworks.
10) No need to use Sass or Less.
11) Separate CSS to different file with name style.css
12) Put images in to img folder
13) If need, link fonts via: https://fonts.google.com/ or download and put it to separate folder
14) Basic folders structure. Create HM2 folder
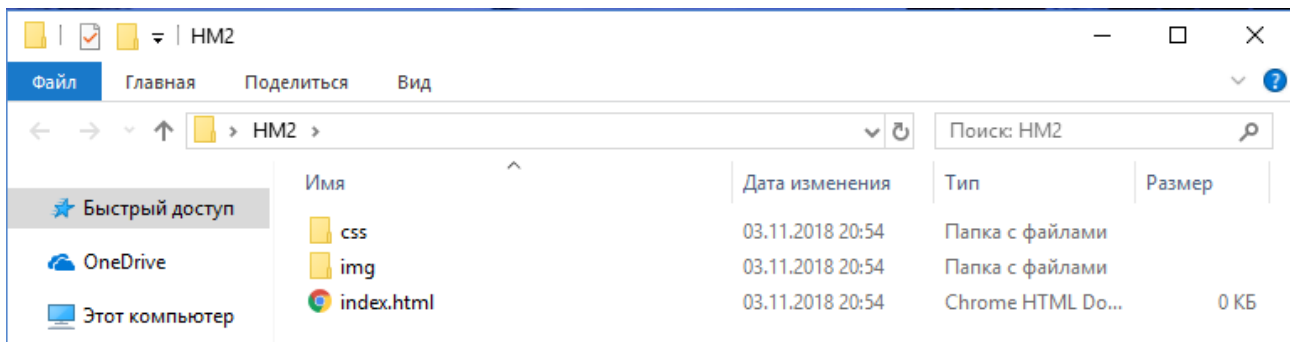

15) Provide some page screenshots
16) Commit and push your HM2 folder with all files to the new **HM2** branch

That is all.
Good luck.
